

Computing

At First Tower School, we recognise that Computing is an integral part of the Jersey Curriculum as well as a global phenomenon, which is rapidly changing the world in which we live. We aim to provide a broad and balanced Computing Education, which is structured and progressive. We also acknowledge that our pupils are entitled to have access to quality and current hardware and software. It is our intention to inspire each child to become a responsible, competent and creative citizen in an increasingly digital world.
